

SUNWAY
森维机械

THE LEADER OF CRAWLER TRACTORS

**SHANDONG SUNWAY
MACHINERY CO., LTD.**

Professional, innovative and efficient

SUNWAY
森维机械

Sunway Machinery Co., Ltd. is a comprehensive supplier engaged in R&D, sales and service of construction machinery and agricultural garden machinery. Our main products are: crawler tractors, backhoe loaders, mini excavators, towable backhoe, multi-functional agricultural tillers, all-terrain crawler trucks, etc.

Sunway Machinery's products meet international quality standard and have obtained CE certificate, and have been greatly appreciated in different markets all over the world. Our cooperated customers all over Europe, North America, Southeast Asia, Oceania, Central Asia, Middle East, South America, Africa and other regions.

We provide customers with professional and personalized mechanical equipment solutions and full-process quality control services. Many customers have repeatedly purchased our products and have established long-term and stable cooperative relations with us.

We have a professional technical and sales team that can provide customers with 7days*24hours quality service. Customers can get free high-definition online video technical guidance. We are committed to ensuring customer satisfaction through strict quality control and thoughtful service.

We can also accept O E M and O D M orders, and are happy to help our customers create their own brands in the local market. We know that quality is the soul of an enterprise. We believe that our equipment will make you stand out from the competitors.

Sunway Machinery focuses on providing you with high-quality and cost-effective professional machinery!

SWCT-502

SWCT Full Range of Crawler Tractors

Because of its low center of gravity and large surface adhesion coefficient, crawler tractor has good slope stability against overturning and sliding, and it also has the characteristics of small turning radius and strong cross-country climbing ability. It has better adaptability than wheeled tractors for heavy-duty planting and terrace operations such as farmland, heavy sticky land and wasteland reclamation in mountainous and hilly areas.

In particular, the large slope of cultivated land in hilly areas and the uneven soil resistance will cause the disadvantages of poor stability, unsafety, uneven working depth and low working quality of wheeled tractors in slope operation. Farmers' choice of crawler tractors for ploughing and raking will obviously improve the quality of operation.

SWCT-802

SWCT-602

SWCT-25

SERIES 25 HORSEPOWER RIDING CRAWLER TRACTOR

Product Feature

- Adopt top brand 25HP high horsepower diesel engine, lower fuel consumption brings stronger power output
- The whole body frame is made of thickened steel plates of T3/T4 grade which is strong and durable.
- The gearbox is equipped with 3 forward gears and 1 reverse gear for easy operation.
- Widened and thickened 5-layer steel wire engineering rubber tracks with strong climbing ability.
- Multi-purpose integrated into one machine, standard implements: Rotary Tiller, Weeding Wheel, Backfilling Knife, Trenching Knife, Bulldozer Blade.
- SWCT-25B crawler rototiller is suitable for dryland, farm, orchard, greenhouse and other areas.
- SWCT-25BW waterfield+dryland crawler rototiller has reinforced and heightened chassis, wider and thicker tracks for waterfield, and waterproof bearing oil seal inside each. They are very suitable for paddy fields, fish ponds and mud areas.

Standard Implements

Rotary Cultivator

Trenching Knife

Bulldozer

Backfilling Knife

Weeding Wheel

Technical Sheets

Sunway Swct-25 Series Mini Crawler Rotary Cultivator			
Machine functions and parameters	Model	SWCT-25B for dry field	SWCT-25BW for both dry field and paddy field
	Total Weight	700 KG	750kg
	Dimension (L*W*H mm)	2700x1060x1200mm	2500x1060x1550mm
	Standard Attachments	Rotary Tiller Width: 100cm Weeding Wheel Width: 100cm Backfilling Knife Width: 100cm Trenching Knife: 30x30cm Bulldozer Blade Width: 100cm	
	Engine Model	Single cylinder diesel engine made in China	
	Transmission gear	Three forwards and one backward, high and low speed	
	Driving Speed	2km/h	
	Working Speed	1-2mu/h	
	Diesel Fuel Consumption	1-2L/mu	
	Rubber Track Width	18cm	25cm

SWCT-35

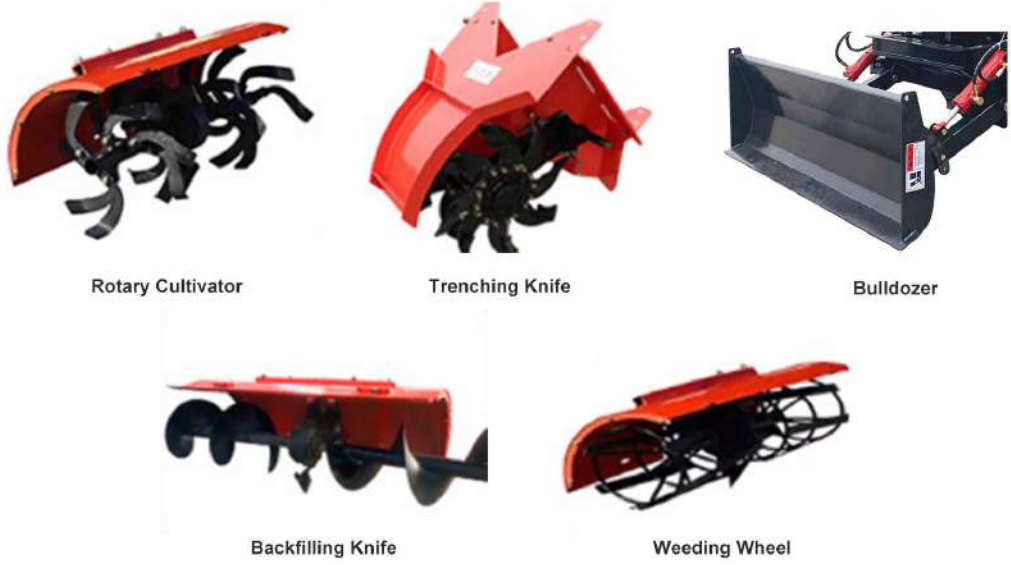

SERIES 35 HORSEPOWER RIDING CRAWLER TRACTOR

Product Feature

- Adopt top brand 35HP high horsepower diesel engine, lower fuel consumption brings stronger power output
- The whole body frame is made of thickened steel plates of T3/T4 grade which is strong and durable.
- The gearbox is equipped with 3 forward gears and 1 reverse gear for easy operation.
- Widened and thickened 5-layer steel wire engineering rubber tracks with strong climbing ability.
- Multi-purpose integrated into one machine, standard implements: Rotary Tiller, Weeding Wheel, Backfilling Knife, Trenching Knife, Bulldozer Blade.
- SWCT-35A/35B crawler rototiller is suitable for dryland, farm, orchard, greenhouse and other areas.
- SWCT-35AW/35BW waterfield+dryland crawler rototiller has reinforced and heightened chassis, wider and thicker tracks for waterfield, and waterproof bearing oil seal inside each. They are very suitable for paddy fields, fish ponds and mud areas.

SWCT-502

SERIES 50HP MULTIPURPOSE CRAWLER TRACTOR

Product Feature

- Adopt top brand 50HP high horsepower 4-cylinder diesel engine, lower fuel consumption brings stronger power output.
- The whole body frame is made of thickened steel plates of T3/T4 grade which is strong and durable.
- The gearbox is equipped with 4 forward gears and 1 reverse gear for easy operation.
- Widened and thickened 5-layer steel wire engineering rubber tracks with strong climbing ability.
- Using the universal 3-point quick connection design, can be quickly connected with 30+ kinds of attachments to achieve a variety of functions, truly multi-purpose machine.
- SWCT-502A crawler tiller is suitable for dryland, farm, orchard, greenhouse and other areas.
- SWCT-502B waterfield+dryland crawler tractor has reinforced and heightened chassis, wider and thicker tracks for waterfield, and waterproof bearing oil seal inside each. They are very suitable for paddy fields, fish ponds and mud areas.

Optional Implements

The crawler tractor rotary cultivators are provided with rotary ploughing, furrowing, weeding, fertilizing, pesticide application, backfilling, ridge and bulldozing with their attachments quick hitched and thus its utilization up greatly. A detailed list of 30+ kind attachments on page 17.

Rotary Cultivator

Middle Ditching

Double Plow

Bulldozer Blade

Hydraulic Flip Plow

Excavator Boom and Bucket

Front Loader Bucket

Multifunctional Windrower

Tree Pit Driller

VARIOUS ATTACHMENTS & IMPLEMENTS OF SWCT SERIES CRAWLER TRACTOR

Application

- The SWCT series crawler tractor rotary cultivator has the characteristics of multiple functions, and wide adaptability. It is ideal for both dry land and paddy field .
- Adding more optional attachments to enable you to efficiently complete various small-scale projects: garden, farmland, vegetable greenhouse, digging trench, irrigation installation and drainage projects.
